eLogs Forms and Specific Applications

Internship (Traditional) eLogs:
(Available now)

Ambulatory Case Participation:
Used for all clinic/office visits. Ambulatory Case Participation may be used for OMM/OMT visits performed at the clinic, preoperative consults and postoperative visits.

Birth C-Section:
Used for all cesarean births. (Not used by OB Residents)

Birth Vaginal Delivery:
Used for all vaginal births. (Not used by OB residents)

Educational Programs:
Used to log all lectures, talks or demonstrations attended or given, such as but not limited to noon lectures, weekly departmental lectures and SCS education days.

Inhouse Case Participation:
Used for all Hospital patient encounters such as but not limited to all H&Ps, House officer duty, and ER call, etc.

Medical Management of the OB Pat:
Used for all Hospital OBGYN patient encounters not involving a birth, such as, but not limited to all H&Ps, House officer duty, OR and ER call. Is not used for clinic or office visits, nor used by OB Residents.

Procedures:
Used for all non-surgical procedures. This is also the catch all log; if the intern does not know where to log a procedure/activity he/she may use the Procedures log.

Reading Program:
Used to log assigned and optional reading done during the rotation such as, but not limited to, journal club activities, text book reading assignments and case research.

Service Evaluation:
This log may be required if your Hospital/Institution does not have its own service evaluation software. Check with Medical Education to confirm the use of this log.

Surgery:
Used for all OR and bedside surgical procedures.

OBGYN Resident eLogs
(Available now - required by ACOOG)

OBGYN RES Gynecologic

This log is used to record non-obstetric hospital patient encounters. OBGYN RES Gynecologic is organized by anatomical regions. The log features point and click drop down menus that include surgical and non-surgical procedures performed in the hospital. These include gynecologic, urogynecologic and gynecologic/oncologic procedures, as well as general surgery. This log may be used for, but is not limited to diagnostic procedures (e.g. diagnostic hysteroscopy,) general surgery procedures (e.g. appendectomies,) urogynecologic procedures (e.g. urethrovesical suspension) and gynecologic procedures (Oophorectomies.)

OBGYN RES Obstetric

This log is used primarily to record vaginal and cesarean births. The log features point and click drop down menus that record vaginal and cesarean births, cesarean procedures including cesarean hysterectomies as well as obstetric diagnostic procedures such as amniocentesis and OB ultrasounds done in the hospital.

OBGYN RES Other

This log is used to record procedures that do not fall into any other activity log category. The log features point and click drop down menus that record circumcisions, OMM/OMT not performed at the clinic, and non-OB transabdominal or transvaginal ultrasound not preformed at the clinic. Additionally, the log has free text fields used to record procedures not listed elsewhere.

Case Logs DO

This log is used to record all non-women's health Hospital and Ambulatory Clinic/Office visits. The log is used to record pediatric and men's health patient encounters such as but not limited to ambulatory care, H&Ps, House officer duty, and ER call. The log features point and click drop down menus that include the 50 most commonly seen diagnoses and 80 most commonly performed procedures done in an ambulatory or hospital setting by primary care practitioners.

Educational Programs:

Used to log all lectures, talks or demonstrations attended or given, such as but not limited to noon lectures, weekly departmental lectures and SCS education days.

Reading Program:

Used to log assigned and optional reading done during the rotation such as, but not limited to, journal club activities, textbook reading assignments and case research.

Surgery:

Used to record all non-women's health operating room and bedside surgical procedures.

Primary Care Resident eLogs
Includes IM and FM
(Available now)

Case Logs DO

This log is used to record all Hospital and Clinic/Office visits. It is used to record all patient encounters such as but not limited to all ambulatory care, H&Ps, House officer duty, and ER call. The log features point and click drop down menus that include the 50 most commonly seen diagnoses and 80 most commonly performed procedures done in an ambulatory or hospital setting by primary care practitioners.

Case Logs OB

This log is used primarily to record vaginal and cesarean births. It features point and click drop down menus that may be used to record, but are not limited to, vaginal and cesarean births, cesarean procedures including cesarean hysterectomies as well as obstetric diagnostic procedures such as amniocentesis and ultrasounds done in an ambulatory or hospital setting by primary care practitioners.
